## DETAILED ACTION

### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The applicant's independent claim of an apparatus for feeding porous sheets of media, which includes:

- directing a flow of gas onto a first sheet of the stack such that the gas passes partially through the first sheet and impinges on a second sheet,
- generating a cushion of air between the first and second sheets to separate the first and second sheets

defines over the prior art of record.

Several separating methods disclosed in the prior art include blowing fluid (air) into the sides of the topmost sheet (i.e. by an "air knife") (See e.g. US Patents Nos.: 3,558,126 to Jiruse; 5,110,110 to Wirz et al.; 6,398,206 to Yang et al.).

SU 1680606 to Mosc Printing Inst. discloses a method for separating sheets which includes blowing fluid (air) through the gap between the top sheet and the guide surface from the middle of the sheet towards the side edges of the sheet. Since the air is directed from the middle of the sheet to edges of the sheet, it appears the air does not go *through* the sheet and that the sheet is non-porous. Therefore, this reference does not disclose or suggest the claimed method.

None of the prior art of record discloses or suggests separating sheets by blowing fluid *through the top of a porous topmost sheet*. As a result the independent claim is deemed novel and non-obvious in light of the examiner's search of the prior art. Further, since the dependent

claims must necessarily include all the limitations of the independent claims from which they depend, the dependent claims are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Allowable Subject Matter***

Claims 1-6 are allowed.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
